

CHAPTER 3

On pages 94-99: 'A real life example', the date ranges are muddled.

Sometimes the text and the graphs refer to 2010-2014, elsewhere to 2015-2019. They all relate to the same data collected over a five year period.

CHAPTER 4

Although the calculation shown was correct the figure 10.3 on Page 126 didn't match the text and the the chart in figure 10.4.

Here is the correct chart.
